DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Claims 1-10 drawn a polynucleotide comprising an immunostimulatory tag shown in Table 1 of the specification, and encoding a factor; an array of probes comprising the polynucleotide, a host cell, and a gene delivery vehicle, classified in class 435 subclass 287.2.
2. Claims 11 and 12 drawn to a method of inducing an immune response in a subject comprising administering a polynucleotide comprising an immunostimulatory tag and encoding a factor, classified in class 514 subclass 44.

After election of group 1 or 2, a further group restriction is required among the 2137 tags listed in Table 1, and also between the factors PARC, TARC, MCP-4, MDC, escalatin, and MCP-2. This is not a species election requirement. Absent evidence to the contrary, each nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq. See MPEP 803.04.

The inventions 1 and 2 are distinct, each from the other because of the following reasons:

Inventions 1 and 2 are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the

Art Unit: 1635

process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product could be used for other purposes such as a hybridization probe in an array of probes.

Any inquiry concerning this communication or earlier communications from the examiner(s) should be directed to Richard Schnizer, whose telephone number is 703-306-5441. The examiner can normally be reached Monday through Friday between the hours of 6:20 AM and 3:50 PM. The examiner is off on alternate Fridays, but is sometimes in the office anyway.
